

Secure Interconnection Solutions

Provide mobile workers a seamless link to your corporate network with our highly secure TAN (Terrestrial Access Network) interconnection solutions.

Access all business and high-speed applications from anywhere on the planet, including email, video-conferencing, voice over IP, store & forward, live video streaming, etc.

Whatever your infrastructure, we ensure secure data transmission from the satellite to the customer premises, creating a fully-fledged mobile office environment.

Key benefits

- Flexibility: 5 different TAN solutions to suit any of your requirements.
- Guaranteed bandwidth: with TAN ISDN, Leased Line & MPLS, we deliver guaranteed end-to-end bandwidth from the user's terminal to your corporate network.
- Security: all communications are secured and optionally encrypted.

- Customization: each solution is tailored and integrated according to your company's network infrastructure.
- Scalability: you can upgrade when you like to other TAN solutions to meet growing traffic.

A choice of interconnections

Vizada delivers a full range of Terrestrial Access Network (TAN) solutions to meet your needs:

- TAN IP Sec: Virtual Private Network over IP-Sec encryption technology. Cost-effective & easy to install.

- TAN ISDN: on demand interconnection over single or combined ISDN channels, delivering low cost bandwidth up to 256 kbps.
- TAN Leased Line: dedicated point-to-point terrestrial link with guaranteed bandwidth for high-speed applications.
- TAN MPLS*: Virtual Private Network over global MPLS network, with guaranteed bandwidth for high-quality applications.
- TAN Hosting: Equipment hosting facilities at Vizada's premises.

* Solution offered via the Orange Business Service network. Available soon.

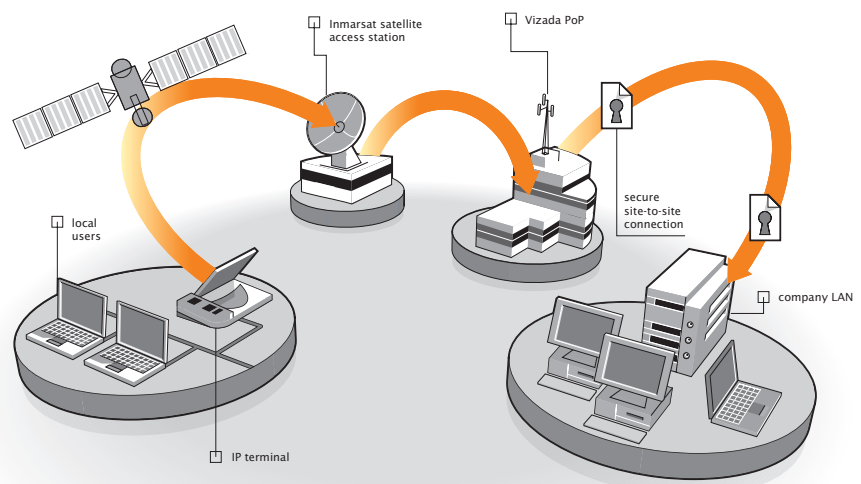

We have a TAN solution to fit your needs

Solutions	Products	Typical Applications	Coverage
TAN IP-Sec	BGAN, RBGAN, MPDS	corporate access	global
TAN ISDN	BGAN streaming IP only	live and store & forward video	depending on ISDN availability at customer's premises
TAN Leased Line	BGAN, RBGAN, MPDS	for simultaneous users: corporate access live video streaming video conferencing VoIP	depending on leased line availability at customer's premises
TAN MPLS	BGAN, RBGAN, MPDS	for simultaneous users/multiple sites: corporate access live video streaming video conferencing VoIP	depending on last-mile leased line availability
TAN Hosting	Extension of TAN Leased Line & MPLS solutions	hosting	Amsterdam (NL) Aussaguel/Toulouse (FR) New York (US)

A unique & dedicated infrastructure

We designed our network to provide the highest level of quality & security.

- Quality of Service: all segments of our infrastructure are fully redundant.
- Top security: our network architecture & firewalls protect customers' traffic.
- Access management: end-user authentication is required automatically.
- Efficiency: traffic is routed through the nearest Point of Presence (PoP) to minimize transfer delays.
- Value-added services: Vizada can provide an IP address scheme, traffic management, budget control, prepaid cards for data communications, messaging, etc.
- And more: on demand, we deliver customized equipment, hosting & maintenance services.
