

Scratch & Web

Welfare communications to keep your teams connected

Benefit from emailing, web surfing and content downloading from any remote location, while keeping a cap on spending.

Providing each user with an amount of personal prepaid credit for data transmission, Scratch & Web cards are ideal for managing communications of ship crews or teams working in remote areas: military personnel, NGO workers, journalists, mining & exploration teams, etc.

Scratch & Web prepaid cards can be used 24/7, on land or at sea, on all the following Inmarsat terminals: BGAN, R-BGAN, GAN, Fleet (128, 77, 55, 33)*.

Scratch & Web key benefits

- Internet at your fingertips: simply start your web browser and enter your PIN to connect up.
- Transparency: manage all your Scratch & Web cards online (cost control, card reload and parameter settings).
- Cost-effectiveness: no connection fee, no minimum call length/volume for end users.
- Security: personal access guaranteed with confidential PIN code.
- Flexibility: team members can share a single terminal using their personal card.

Internet in seconds

Enjoying web and e-mail services in remote areas has never been so easy. Data communications can be made in three simple steps:

- Open an internet session on the terminal.
- Start any web browser.
- Enter the confidential Scratch & Web PIN code in the displayed login page.

During the session, the monitoring page enables the on-line control of remaining credit (see following page).

* This prepaid solution is valid on a postpaid terminal where internet communication is dedicated exclusively to the Scratch & Web service.

On-line budget & parameter control

The Scratch & Web online portal enables the administration and control of all communications:

- Check and monitor initial, consumed and remaining credit.
- Define a volume limit in order to receive an alert before the card runs out of credit.
- Set a time threshold whereby the session disconnects automatically after a set period of inactivity.
- Consult traffic details for a specific timeframe.

Credit alarm : (kbytes)

Disconnect time out : (min)

A full deck of cards for a variety of needs

Our Scratch & Web cards are available in several configurations to match any requirements:

- Card format:
 - Physical: reveal the confidential PIN code by scratching the silver strip on the back of the card.
 - Virtual: the confidential PIN code is sent securely by e-mail or on a disk.
- Card type: reloadable or non-reloadable.
- Card credit: up to 20 MB* for physical cards and on demand for virtual ones.
- Card layout:
 - Standard Vizada cards.
 - Customized versions thanks to our co-branding facilities.

Inmarsat services	Physical*	Virtual	Unit
BGAN	5, 10 and 20 MB	on demand	bytes
RBGAN	5 and 10 MB	on demand	bytes
MPDS	16 Mb	on demand	bits

* For customized credit on physical cards, please contact your account manager.

Note: Scratch & Web physical cards expire one year after first usage.
